

# COMUSYC NEWSLETTER

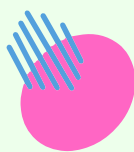

OCTOBER 2022

## THE PROJECT

CoMuSYc project aims to play an active role in fighting against the risk of social exclusion, providing tools and strategies for keeping open the lines of dialogue with marginalized youth, helping them in expressing their fears, and valorizing their key competencies and skills in an open Europe.

Another project goal is to develop transversal and transferable skills in young EU citizens in order to help them integrating better into the society as well as into the labour market.

## WHY IS THE COMUSYC PROJECT INNOVATIVE?

The core innovation of CoMuSYc resides in its idea of creating a series of learning access points in everyday experience, where individuals will have to express their ideas with imaginative, structured non-formal and informal cultural and artistic learning.

The innovation aims to support young people and NEETs by developing a peer mentoring framework supported by tutors, so that they can better chart the skills and expertise involved.
